

Jafar Aliyev

Software Developer

With a strong passion for this field, I delve into in-depth exploration of Java features that are often overlooked in university programs, including Java streams, optionals, and functional programming in Java. I have a solid command of using Git for version control and hands-on experience in the Software Development Life Cycle (SDLC). Over the summer, I actively contributed to the Physilance project, working on both the Java Spring back-end and React front-end.

WORK EXPERIENCE

Software Developer Intern Silk Way West Airlines

05/2023 - 08/2023

Achievements/Tasks

- Worked alongside a group of software developers to plan, create, and uphold server-side applications.
- Played a role in introducing strong and scalable server solutions to facilitate real-time data processing and communication.
- Engaged in regular code reviews, addressed bugs, and played a key part in the ongoing enhancement of the server-side code base.
- Feel free to request a recommendation letter from Silk Way West.

Contact : Fuad Gasimzade - fgasimzade@gmail.com

Software Developer Intern Global Security Systems

05/2023 - 08/2023

Achievements/Tasks

- Designed and developed a user-friendly website for Global Security Systems.
- Collaborated with cross-functional teams to gather requirements, conceptualize the website's layout and features.
- Wrote scripts and code for intelligent home systems, allowing automation, remote access, and real-time monitoring of security and environmental parameters.
- Conducted regular testing and debugging to identify and resolve issues, ensuring the reliability and functionality of the website and intelligent home systems.
- A recommendation letter from Global Security Systems is available upon request.

EDUCATION

Bachelor of Science in Computer Science McGill university

09/2020 - Present

Montreal, Canada

Courses

- Artificial intelligence
- Algorithms and Data Structures
- Database
- 6-month long Software engineering project

SKILLS

Java

Python

C

Linux

Git

React

Java Spring

SQL

Bash

REST

Unit Testing

Software Design

PERSONAL PROJECTS

Splendor (Web application)

- Successfully created a fully functional online game with an engaging user experience, attracting players and positive feedback.
- Demonstrated proficiency in both React and Java Spring development and effective teamwork, showcasing versatility and expertise in full-stack development.
- Implemented networking and polling that enhanced player interaction and engagement.
- Gained experience in collaborative project management, architecture design, and deployment processes.
